

Innovation with a purpose.™

Vision even a superhero would envy.

Troubleshoot and identify potential problems before they happen with the IDEAL HeatSeeker™ Thermal Imager. Dual cursors instantly locate the hottest (⊕) and coldest (⊖) temperatures on a live screen, ranging from 14° F to 660° F. Mark images with text and voice annotation for easy file retrieval when using the software for generating reports. See all the amazing powers of the cost-effective HeatSeeker at [www.idealindustries.com](http://www.idealindustries.com).

Digital Photo      25% Thermal      50% Thermal      75% Thermal

**Adjustable blended view for ease of use:** The HeatSeeker™ captures both a full infrared image and a digital photo. The thermal image can be overlaid on top of the digital image in various % blends for clarity.

The versatile preventative maintenance tool for electrical, industrial and building inspection.
